

Saratoga Springs Fire Department

Work Session #1
8-16-11

**Month End Report
July 2011**

*The mission of the Saratoga Springs Fire Department is to provide a wide range of services to the community designed to protect and preserve life, property, and the environment, through planning, prevention, education and response. We are committed to excellence in the delivery of these services:
“Proudly We Serve.”*

Saratoga Springs Fire/EMS Monthly Report

July 2011

Training- Staff participated in a total of 61 hours of training this month which included extrication and the new water rescue boat.

Public Education- The Department taught a CPR class again which was open for signing up to the public. These classes are a great benefit to our community and its residence. The more people that are trained on proper cpr in our city, the more probably that someone who is in need of these skills will get this service much faster.

Fire Prevention- 10 business inspections were completed during the month. All hydrants have been completed for inspections and we have been logging them into the computer.

Training/Community Room- The training room was used by, 9/12 Group and by the Library-Story Time.

Community- July was a big celebration month for area cities and we were able to pull the rescue boat in many surrounding city celebration parades. The Saratoga Springs Royalty were able to be a part of this as they were in the boat. Staff also attended a 5 K and carnival in Harvest Hills. We will be offering another CPR class in the coming month to the community as well.

Maintenance- HB261 had some new tires put on it. The exhaust pipe was re-welded by staff to E-261. An Ice Machine was installed at station 261. A Scout service project benefitted the department when they came and painted yellow lines in our bay area to help assist the trucks in backing up straight as well as red paint on the curbing around the station in no parking zones. New radio chargers were put in A262 due to the two that were originally installed being faulty. Air samples were taken from the air trailer for testing and we had a four gas monitor recalibrated.

Staff-

Other- An auto pulse machine was put into service this month that will greatly increase the effectiveness of our jobs in cardiac arrest patients. This device is used to automatically give compressions to a CPR patient which frees up a rescuer to help in another aspect of the call. These types of calls are very labor intensive and we often need extra hands on these. This is a great way to fill that gap and provide a better service to our city.

July Responses
