

LEGEND

SPECIAL FLOOD HAZARD AREAS INUNDATED BY 100-YEAR FLOOD

- ZONE A** No base flood elevations determined.
- ZONE AE** Base flood elevations determined.
- ZONE AH** Flood depths of 1 to 3 feet (usually areas of ponding); base flood elevations determined.
- ZONE AO** Flood depths of 1 to 3 feet (usually sheet flow on sloping terrain); average depths determined; for areas of alluvial fan flood velocities also determined.
- ZONE A99** To be protected from 100-year flood Federal flood protection system under construction; no base flood elevations determined.
- ZONE V** Coastal flood with velocity hazard (w/ action); no base flood elevations determined.
- ZONE VE** Coastal flood with velocity hazard (w/ action); base flood elevations determined.

FLOODWAY AREAS IN ZONE AE

OTHER FLOOD AREAS

- ZONE X** Areas of 500-year flood; areas of 100-year flood with average depths of less than 1 foot with drainage areas less than 1 square mile and areas protected by levees from 100-year flood.

OTHER AREAS

- ZONE X** Areas determined to be outside 500-year flood plain.
- ZONE D** Areas in which flood hazards are under mind.

UNDEVELOPED COASTAL BARRIERS

- Identified 1961
- Identified 1990
- Protective Areas

Coastal barrier areas are normally located within or adjacent to special flood hazard areas.

NOTES

This map is for use in administering the National Flood Insurance Program. It does not necessarily identify all areas subject to flooding, particularly from local drainage sources of small size, or all geographic features outside Special Flood Hazard Areas. The community map reporter should be consulted for more detailed data on SFHAs, and for any information on floodway delineations, prior to use of this map for property purchase or construction purposes.

Areas of Special Flood Hazard (100-year flood) include Zones A, AE, A1-A30, AH, AO, A99, V, VE and V1-V30.

Certain areas not in Special Flood Hazard Areas may be protected by flood control structures.

Boundaries of the floodways were computed at cross sections and interpolated between cross sections. The floodways were based on hydraulic considerations with regard to requirements of the Federal Emergency Management Agency.

Floodway widths in some areas may be too narrow to show to scale. Refer to Floodway Data Table where floodway width is shown at 1/200 inch.

Corporate limits shown are current as of the date of this map. The user should contact appropriate community officials to determine if corporate limits have changed subsequent to the issuance of this map.

For adjoining panels, see separately printed Map Index.

MAP REPOSITORY
City of Saratoga Springs
2015 South Redwood Road
Saratoga Springs, Utah 84043
(Maps available for reference only, not for distribution.)

INITIAL IDENTIFICATION:
JANUARY 10, 1978 (Utah County)

FLOOD HAZARD BOUNDARY MAP REVISION:
OCTOBER 15, 1982 (Utah County)

FLOOD INSURANCE RATE MAP EFFECTIVE:
OCTOBER 15, 1982 (Utah County)

FLOOD INSURANCE RATE MAP REVISIONS:

Refer to the FLOOD INSURANCE RATE MAP EFFECTIVE DATE shown on this map to determine when actual rates apply to structures in the zone where evaluations or depths have been established.

To determine if flood insurance is available in this community, contact your insurance agent or call the National Flood Insurance Program at (800) 638-6629.

LEGEND

To obtain more detailed information in areas where Base Flood Elevations (BFEs) and/or Floodway Boundaries have been determined, users are encouraged to consult the Flood Profile and Floodway Data tables contained within the Flood Insurance Study (FIS) report that accompanies the FIRM. Users should be aware that BFEs shown on the FIRM represent rounded whole-foot elevations and therefore may not exactly reflect the flood elevation data presented in the FIS. For construction and/or floodplain management purposes, users are encouraged to use the flood elevation data presented in this FIS in conjunction with the data shown on the FIRM.

Elevation Reference Marks (ERM) elevations listed on this map were obtained and/or developed to establish vertical control for determination of flood elevations and floodplain boundaries portrayed on this map. Users should be aware that some ERM elevations may have changed since the publication of this map. To obtain up-to-date elevation information, the National Geodetic Survey (NGS) ERM data shown on this map, please contact the National Geodetic Survey, Branch of the NGS at (301) 725-2525 or (703) 293-2525. **Warning:** Some ERM elevations should speak verification of non-NGS local monument elevations when using these elevations for construction or floodplain management purposes.

Coastal BFEs shown on this map apply only to structures of 0.7 National Geodetic Vertical Datum (NGVD). Users on that FIRM should be aware that coastal flood elevations are also provided in the Summary of Distinctive Elevations table in the Flood Insurance Study report for the community. Elevations shown in the Summary of Distinctive Elevations table should be used for construction and/or floodplain management purposes when they are higher than the elevations shown on this FIRM.

FLOOD HAZARDS SHOWN WITHIN THE UNINCORPORATED AREAS OF UTAH COUNTY AND THE CITY OF LEHI ARE FOR INFORMATION ONLY. FOR FLOOD INSURANCE RATE PURPOSES, REFER TO SEPARATELY PUBLISHED FLOOD INSURANCE RATE MAP (FIRM).
